NOTE 1: This is the number that is assigned to a service or parts quote.

NOTE 2: Valid types are L - actual stock item line (W/O quote only)
A - add on line (W/O quote only)
M - miscellaneous charge line (W/O quote only)
P - part line
T - actual segment totals record (W/O quote only)
Q - quoted segment totals record (W/O quote only)

NOTE 3: Possible values - W - work order quote line
P - part quote line

NOTE 4: This is a code that designates whether the quote segment is an estimate or a quote.
Q - segment is a quote
E - segment is an estimate

NOTE 5: The stock number of the equipment on the service quote.

NOTE 6: This is the make designation of either the equipment on the segment, if there is no flat rate, or the make associated with the flat rate.

NOTE 7: This is the model designation of either the equipment on this segment, if there is no flat rate, or the model associated with the flat rate.

NOTE 8: This is the machine serial number of the equipment on this segment.

NOTE 9: If the quote line is for a part, this will contain the part number.

NOTE 10: This is the flat rate code for the work to be done on the service quote item. If no flat rate is required, it could be blank, or "NA".

NOTE 11: This is the hourly rate code that is to be used for work on this quote segment. It may be blank if a rate is manually entered.

NOTE 12: This is the hourly rate for work being done on this quote segment. This will default to the value associated with a rate code that is keyed, but it may be overridden.

NOTE 13: The extended labor hours for the quote item.

NOTE 14: The extended dollar amount of labor for the quote item, not including any add ons that may be associated with it.

NOTE 15: The quantity of the quote item.

Field	Description	Name	Alias	Note	A/N	B/P	Start	End	Len	Dec	Key	A/D
-------	-------------	------	-------	------	-----	-----	-------	-----	-----	-----	-----	-----

NOTE 16: The description of the quote item.

NOTE 17: The extended amount for the quote item.

NOTE 18: The description of the promotion desired for this quote item.

NOTE 19: This is the repair status of the segment. Valid values are 5, 7 and 8.

NOTE 20: This is the technician code for the quote segment.

NOTE 21: This is used to indicate whether the extended description for the flat rate should print on the hard copy. It will default to "Y" during quote creation, but if the flat rate extended description is copied in, it will change to "N".
